

**Clean Air
Action
Friends**

How everyone can help on
Clean Air Action days and all year long.

Take a walk to see your friend;

catch the bus around the bend.

Ride your bike, don't take the car.

Make sure all your trips aren't far.

Here's another helpful tip:

Do your shopping in one trip.

THE
Banana
Brothers

Don't speed off from that stoplight!

Take your time and do it right.

It's hot outside. Don't refuel!

Wait 'til later when it's cool.

Clean Air Action Day?

Let the grass grow...

and wait 'til six before you mow.

Tell friends and family what you've learned,
that a healthy planet must be earned.

EARTH
REPORT
 AIR
A+

What is air pollution?

Air pollution comes from things we use everyday like automobiles, lawnmowers, and fireplaces.

Air pollution is bad for you. It can hurt your lungs and make it hard to breathe.

You can help
fight air
pollution!

Watch for Clean Air Action Days on television, in the newspaper, and on the radio. A Clean Air Action Day informs you that the next day will have elevated amounts of air pollution. Practice some of the tips in this coloring book to help fight air pollution.

IT ALL ADDS UP TO CLEANER AIR
